

NEWPORT

FUEL SOLUTIONS, INC.

DL LUBRICITY TREATMENT

Fuel Application:

Ultra-Low Sulfur Diesel (ULSD)

Dose Rate:

One Liter per 12 mt. (1:12000 treatment ratio). One 208-liter drum treats 2496 mt. Treat tank direct before bunkering.

General Description:

Newport DL Lubricity Treatment is a proven safe, mono-acid treatment solution which provides optimum lubrication protection for all fuel pump types and high-pressure fuel injection systems. A key advantage of **Newport DL Lubricity Treatment** is extremely low cost for fleet operators seeking optimum protection for fuel delivery systems.

Function:

- Provides Excellent Lubricity Protection In all ULSD fuels
- Appropriate for all Fuel Pump Types
- Concentrated for Easy and Economical Application

Availability:

208-liter steel drums, 19-liter steel pails, major worldwide ports

Specifications:

- Classified "non-dangerous" goods
- Flash Point > 390° F
- Light Amber Liquid

Manufactured Under
ISO 9001 Standard
